Doctor Life portable series
The best choice for your happier and healthier life

All human bodies are managed by smooth circulation of blood and lymph.
Doctor Life systems provide dynamic drainage, circulation & soft pressure massage

Luxury Portable, LX7 (4 chambers)

New concept, Digital Homecare System

LX7 [Automatic circulation system]

SYSTEM features

- Automatic operation button
- Touch key pad controllers
- Selection key from Massage mode and circulation mode
- Optional selection controller Foot/calf/knee/thigh
- Precious compression of a set pressure by a digital pressure sensor

Specifications

- Pressure range: 10 ~ 200mmHg
- Time range: 10, 20, 30 minutes
- 2Compression mode: M(massage)mode, C(circulation) mode
- Optional care button: Foot/calf/knee/thigh
- Digital pressure sensor
- Machine size: 260 x 180 x130mm
- Machine weight: 2kg

RevitaPump™ LX7 Sequential Compression Therapy Solutions

RevitaPump

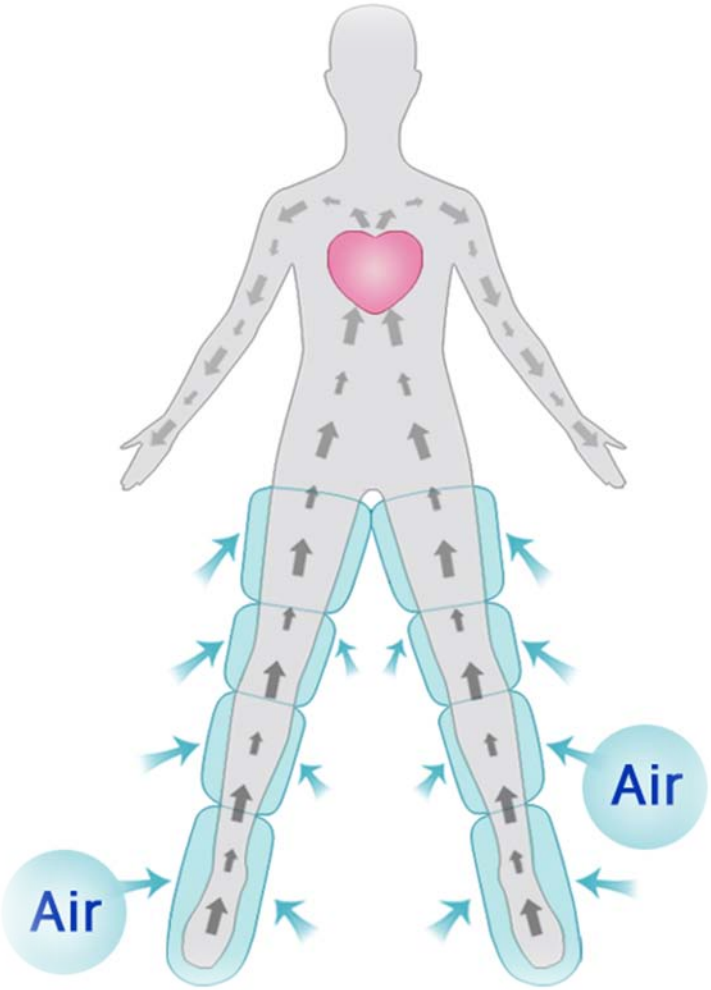
Pneumatic Air Compression Therapy

RevitaPump™ LX7 Sequential Compression Therapy

- **All human bodies are managed by smooth circulation of blood and lymph.**

- **Pneumatic compression systems help that patient recover by promoting blood and lymphatic circulation and increased metabolism.**

- **The LX7 compression system consists of air chambers and a pump providing sequential massaging action to the legs, arms, waist or gluteal regions.**

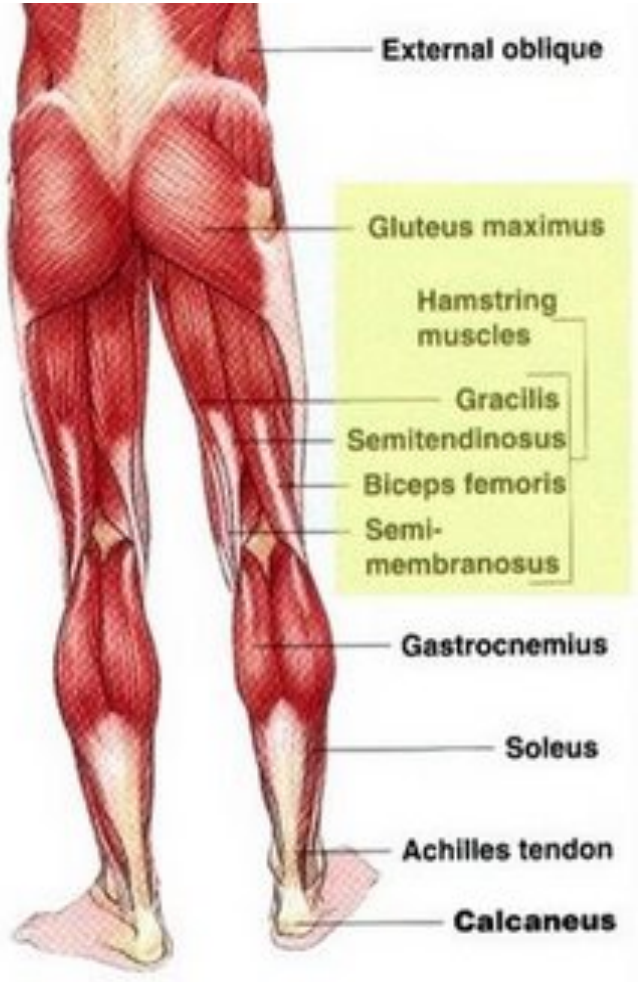


RevitaPump

Pneumatic Air Compression Therapy

Sequential Compression Therapy May Provide Relief...

Muscle Indications



RevitaPump

Home Care Indications

- Muscle Recovery
- Lymphatic Drainage Circulation
- Diseases by interruption in blood circulation
- Fat dissolution
- Swollen limbs
- Numb feet or hands
- Cold feet or hands
- Stress Reduction
- Exercise effects
- Aging, weakness and fatigue
- Cellulite
- For healthier body and elastic skin

Basic Functions for Home use

❖ **Pump Function – (Deflation and Inflation Function)**

Expanding of each capillary vessel by the pump function of the compression movement helps the delivery of clear blood including the increased oxygen over whole human body and the removal of the bad deposits (Cholesterol, etc.).

❖ **Massage Effect**

It massages fatigue and hard muscles, congestion parts or cellulite parts repeatedly with soft air pressure. It promotes the effects of exercise if it is used before and/or after exercise and it's like soft warming up.

❖ **Stretching Effect**

When cuffs pressurize legs, arms or waist, it makes the joints to be stretched naturally.

❖ **Deep Breathing Effect (Abdominal Breathing)**

It makes a user to breathe deeply unconsciously during using a device.

❖ **Waist Cuff Effect**

It is good for waist pain, intestine movement, dissolution of abdomen fat (cellulite) and pelvis contraction movement.

RevitaPump

Home use Tips

It is good to use The RevitaPump in a comfortable posture for the best effects.

The pressure around 20~80mmHg for 15 minutes is proper, but the pressure intensity and time should be controlled by user's preference and physician opinion if necessary.

We recommend all beginners to apply the device with the lowest pressure for 5 minutes for their safe use. User can increase the pressure intensity gradually, according to a patient's state and a doctor's advice.

Use RevitaPump frequently for the best effects.

We recommend to use only one arm cuff at a time because the arm is near to the heart and a user should not use two arm cuffs at the same time. It's good to use two arm cuffs under medical supervision or another user near by.

Try to reathe deeply and repeatedly by matching the rhythm of deflation and inflation of each chamber (Abdominal breathing) because the speed of Doctor Life is the similar with pulse speed. Please breathe out when air from each chamber comes out and breathe in when air comes in each chamber. It makes increase more the effects of Doctor Life.

Use of the LX7 prior to a workout may have benefircial effects

Contraindications: *Do not apply the device if you have any infection or DVT (blood clot) of the limbs, or any congestive heart conditions. Consult your physician immediately.*

RevitaPump

Compression Pumps for circulation & muscle recovery

1. Relaxation of body (Heat)

The relaxation of body is the warming up step to/before receives all therapies. To relax a body, thermo therapies like Sauna, Thermotherapy equipment use, Fomentation with hot pack, steam towel are used in this step. After a body have been warmed and relaxed sufficiently, please go to the next step, the circulation step.

2. Circulation of blood and lymphatic fluid (sequential compression therapy)

After the body is sufficiently relaxed to start the body management, please apply this second step. The main purpose of second step is to help the blood and lymph of whole body to be circulated smoothly. Human beings can't get beautiful healthy skin and body without active movement of whole body. Stagnant circulation and lack of movement may encouragedisease and needless bad fat. Circulation applies/uses air compression like Suction therapy, Pneumatic compression therapy, etc. Specially, our Doctor Life is main item having superiority effects at this step.

"Doctor Life effects in this step"

- **Cellulite removal**

  Bad fat, cellulite arises usually at hip, thigh, abdomen, arm, etc around lymph grand having trouble lymph drainage. Doctor Life removes cellulite by circulating blood and draining lymph artificially with Doctor Life. Specially, as lymph vessel is so weak, the therapy of Lymph by soft air compression of Doctor Life maybe effective.

RevitaPump

Compression Pumps for circulation & muscle recovery

3. Bad fat dissolution

Compression Therapy may dissolve needless fat by increasing the temperature of body with regular circulation operation and massage of rigid muscle, etc.

4. Concentration management -

The step uses generally the therapies using Low frequency, Ultra sound, Supersonic wave, Needles

5. Maintenance

Exercise, Suitable dietary treatment, compression therapy system, etc

Conclusion)

Compression Therapy can be used in many therapeutic areas, but it especially shows most prominent effects helping circulation and recovery.
